DESIGN INSTRUCTIONS

This is a template. It includes:

- **The live visual area.**
- **The area you will be able to see once the graphic is installed.**
- **The printing bleed of 20mm and other required bleeds.**

Note to reduce the file size we have reduced it by **50%** of its actual size.

PRINTING INSTRUCTIONS

300dpi

To ensure the best matching all photo-shop files should be saved as CMYK in PDF format. **Do not use RGB.**

If you have specific logo/corporate colours please provide the **Pantone code.**

Convert all your text to **OUTLINE** and **FLATTEN** all images. This ensures nothing is missed during the transfer of files.

For the best printing results, all images used should have a res-olution of **150 pixels** per inch at **full size**. If this is not possible please make sure you have a resolution is at least **100-120 pixels per inch**.

To ensure your artwork is not cut off please use the guidelines provided sothat you stay within the margins.

The bleed zones are hidden inside the hardware. However, we strongly recommend **extending all images and/or background colours to the outside edges of the template** to ensure there are no “unprinted” areas.

Delete the **original template** before submitting your artwork or it will be included in the finished product.

Accepted File Types: AI PDF EPS
