DESIGN INSTRUCTIONS

This is a template. It includes:

- The live visual area.
- The area you will be able to see once the graphic is installed.
 The printing bleed of 20mm and other required bleeds.

Note to reduce the file size we have reduced it by 50% of its actual

PRINTING INSTRUCTIONS

300dpi

To ensure the best matching all photoshop files should be saved as CMYK in PDF format. Do not use RGB.

If you have specific logo/corporate colours please provide the Pantone code.

Convert all your text to OUTLINE and FLATTEN all images. This ensures nothing is missed during the transfer of files.

For the best printing results, all images used should have a resolution of 150 pixels per inch at full size. If this is not possible please make sure you have a resolution is at least 100-120 pixels per inch.

To ensure your artwork is not cut off please use the guidelines provided sothat you stay within the margins.

The bleed zones are hidden inside the hardware. However, we strongly recommend extending all images and/or background colours to the outside edges of the template to ensure there are no "unprinted" areas.

Delete the original template before submitting your artwork or it will be included in the finished product.
